*** including 5,538 in TT-Mobile (Tajikistan)*

**** 240,000 active subscribers; Taif-Telcom will be consolidated into MTS starting from end-April 2003 following the recent acquisition.*

Russian Cellular Market Breakdown, March 2003

The data above includes only Russian subscribers, all CIS networks were excluded from **Moscow Market**

The month was successful for MTS in Moscow while Megafon delivered disappointing results. Vimpelcom also loses its positions in the capital. If the trend persists, MTS may catch up with Vimpelcom in 2-3 months on the Moscow market.

MegaFon's weak performance in March may be explained by the lack of direct Moscow numbering capacity that the company rents from other operators. The shortage was terminated in the end of the month. In addition, MegaFon launched a new marketing campaign in order to stimulate sales.

Moscow Net Additions in March 2003
