

Despite the traditional August slowdown in mobile sales observed in previous years, the last summer month of 2004 brought as many as 3.1 mln new subscribers, outperforming record July 2004 sales. The subscriber net additions were also 1.5 mln (!) higher than a year ago. Penetration in the country is growing steadily. According to our estimates it has reached 38.3% as of August 31, 2004 (36.2% in July 2004 and 19.6% in August 2003).

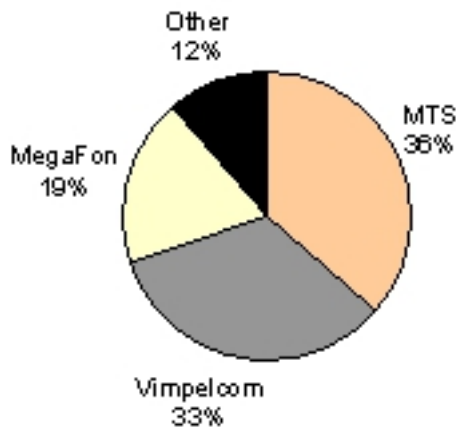

**Russian Mobile Subscribers**

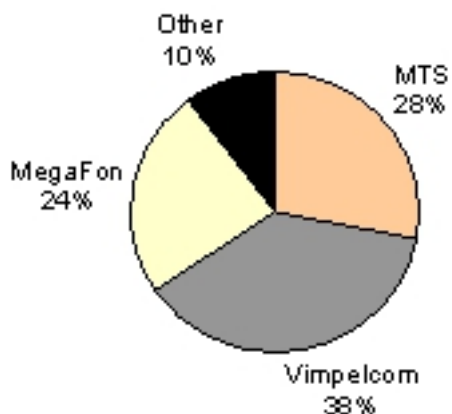

Vimpelcom revs up sales both in Moscow and in the regions encouraged by the resolution of the numbering capacity problem. MTS keeps leading positions in the Moscow License Area. Impressive net adds in Moscow demonstrated by MegaFon should be attributed to introduction of a new tariff whereby customers are being charged for connection only rather than actual air-time used.

 Moscow Market Breakdown  
 August 31, 2004

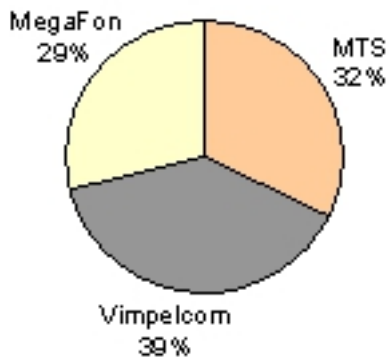

## Mobile Sales Soar in August

Monday, 13 September 2004 17:40

---

### Mobile Sales in Moscow

### St.Petersburg and Leningrad Region

So far Vimpelcom failed to fully capitalise on additional numbering capacity in St.Petersburg. The operator increased the churn in order to free numbers for new customers, while MTS and MegaFon performed quite well in the city, signing 45 thsd and 70 thsd net additional subscribers respectively.

## Beyond Russia

Steady cellular growth is observed in the rest of CIS markets where cellular boom either just started or is to start within the next 6 to 12 months.

Vimpelcom has won the tender for the 2nd largest Kazakhstan operator KaR-Tel. The acquisition deal is to be closed shortly and probably already in September we will add KaR-Tel subscribers to Vimpelcom statistics. That will bring 600+ thsd users under Vimpelcom umbrella.

MTS is about to outnumber its major competitor Velcom in Belarus. MTS has been leading in net additions since April 2003 and finished August with 48% market share. The difference between the two market leaders is just 5,000 subscribers (Velcom had 900 thsd subscribers at the end of August according to Mforum.ru). The remaining 4% of the market is being held by BelCel - NMT/CDMA-450 operator in Belarus. The announcement of the tender results for the 3rd GSM national license may also give a new momentum to the cellular market development in the Republic.
